

AVIAN Engineering, LLC is a Service Disabled, Veteran-Owned Small business that provides executive-level consultation and acquisition support to DoD and major Prime Defense Contractors.

AVIAN is a uniquely-capable company of former senior DoD professionals that has a proven track record of excelling at program management, systems engineering, crew systems and human system engineering, developmental and operational test planning and execution, complex problem resolution, process development and control and concept development and experimentation.

The AVIAN Science and Technology Division provides scientific expertise to the Office of Naval Research (ONR) and other government agencies. Specifically, our scientists support medical technological development in the areas of Warfighter Casualty Prevention and Casualty Care and Management for the Warfighter Performance Science and Technology Department within ONR. AVIAN's scientists act as subject matter experts in their respective fields and perform a wide array of tasks. These include, but are not limited to, concept generation for new programs, program support and execution, government/industry/academia liaison efforts, S&T roadmapping, proposal generation and review, financial support, and systems engineering and integration.

AVIAN's Executive Team has experience across the entire spectrum of the DoD acquisition process and is comprised of U.S. Naval Test Pilot School graduates and former Instructors that have all held highly-visible senior leadership positions within the NAVAIR, SPAWAR, and COTF structure.

AVIAN has experience with planning, programming and executing all phases of the DoD acquisition process with hands-on experience in ACAT-1 Program Management, Major Program Milestone Execution, Concept Developmental and Experimentation, War Game Development, Development Test & Evaluation, Operational Test & Evaluation, Integrated Test & Evaluation, Live Fire Test & Evaluation, and Systems Engineering for aviation and space-based systems. Our employees have formerly held DoD positions as an ACAT-1 Tier 1 IPT Lead, APM(SE) - Class Desk, APM(T&E), Government Flight Test Director (GFTD), Chief Test Pilot, Chief Operational Test Director, and Lead Government Factory Representative at a major DoD Defense Contractor facility.

AVIAN Engineering is currently supporting the U.S. Navy, U.S. Marine Corps, and U.S. Air Force with the H-60, H-53, and V-22 programs at the Program Manager and Tier I Leadership Team levels.
